

## Video Messenger

The Sagaxis Video Messenger software allows you to create and deliver video email to friends, family, colleagues, customers or business prospects using industry-leading video compression techniques that minimize file sizes and download times.

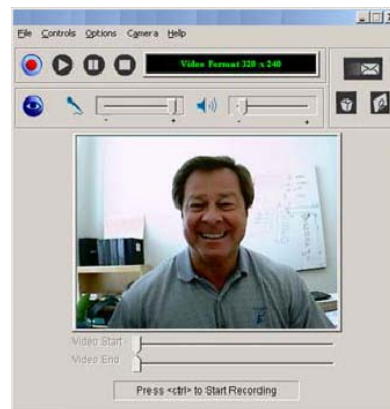

Video Messenger is a video messaging application designed to make sending video email fast, easy and bandwidth friendly for you and everyone you communicate with.

### Typical Applications

- Sales Prospecting: deliver a personal message via email.
- Video training and responses to Frequently Asked Questions.
- Personal communications to regional and branch offices.
- Corporate announcements.
- Communication with family and friends.

### Key Features

- Integrated video player eliminates need for separate player plug-in.
- Independent application, no central server required.
- Compatible with all email client software applications (Microsoft Outlook, Eudora, browser-based email clients, etc.).
- Edits, compresses and compiles AVI files at compression rates in excess of 100:1.
- Simple user interface with VCR-like controls.
- Integrated video editing tool.
- Captures both live video and AVI files.
- Compatible with all standard USB desktop digital video cameras and web cams and some FireWire cameras.
- Simple controls to manage image quality and file size.
- High quality video with crisp images and smooth motion, even at small window sizes.
- Maximum compression efficiency to minimize video file size.
- Self-executable files enable easy viewing from email application.
- Delivery through standard email.

Video Messenger provides an exciting alternative for communicating with business associates, friends, family and customers:

- Create eye-catching video product demonstrations.
- Notify employees of news or policy changes.
- Provide meeting updates to colleagues.
- Offer personal congratulations.
- Personalize thank you messages.
